Fuel: Gas

Payment method: On Receipt of Bill

Your tariff information

About your Gas tariff	
Supplier	Go Effortless Energy
Tariff name	Standard Variable Tariff - October 2019 v1 - SC
Tariff type	Fixed
Payment method	On Receipt of Bill
Unit rate (ppkWh)	3.71
Standing charge (ppday)	30.80
Tariff ends on	Not applicable
Price guaranteed until	Not applicable
Termination Fee	Not applicable
Discounts and additional charges	Not applicable
Additional products or services included	Not applicable
Illustrative Gas cost on this tariff	
Assumed annual consumption	12,000 kWh
Estimated annual cost	£557.62
Tariff Comparison Rate (TCR) (ppkWh)	4.65

Frequently asked questions:

- What is a kWh?

A kWh stands for kilowatt-hour – the unit used to measure energy use. 1 kWh will power a 40 watt light bulb for 25 hours.

- What is the Tariff Comparison Rate (TCR)?

You can use the TCR to compare the cost of your tariff and fuel type with the cost of other available tariffs across suppliers on a like-for-like basis. It is similar to the Annual Percentage Rate (APR) used in savings, credit and loan agreements. The TCR is not an actual price. Instead it's based on typical consumption, which is 3,100kWh/year for electricity and 12,000kWh/year for gas. The amount you're charged will vary depending on how much energy you use.

Frequently asked questions:

- What is a kWh?

A kWh stands for kilowatt-hour – the unit used to measure energy use. 1 kWh will power a 40 watt light bulb for 25 hours.

- What is the Tariff Comparison Rate (TCR)?

You can use the TCR to compare the cost of your tariff and fuel type with the cost of other available tariffs across suppliers on a like-for-like basis. It is similar to the Annual Percentage Rate (APR) used in savings, credit and loan agreements. The TCR is not an actual price. Instead it's based on typical consumption, which is 3,100kWh/year for electricity and 12,000kWh/year for gas. The amount you're charged will vary depending on how much energy you use.
